SHIKOKU

ORIGIN: Japan.

DATE OF PUBLICATION OF THE OFFICIAL VALID STANDARD: 30.10.2016.

UTILIZATION: Hunting dog, companion.

FCI-CLASSIFICATION: Group 5 Spitz and primitive type.
Section 5 Asian Spitz and related breeds.
Without working trial.

BRIEF HISTORICAL SUMMARY: This breed goes back to medium-sized dogs that existed in Japan in ancient times. The Shikoku was bred as a hunting dog, mainly for hunting boar in the mountainous districts of Kochi Prefecture. It is sometimes called « Kochi-ken » (ken = dog). There were three varieties of this breed-Awa, Hongawa and Hata-all named after the area where they were bred. Among them, the Hongawa maintained the highest degree of purity, because the breeding area was not easily accessible. These dogs are tough and sufficiently agile to run through a mountainous region. They are characterized by their sesame coloured coats. The breed took on the name of the region and was designated as a « natural monument » in 1937.

GENERAL APPEARANCE: A medium-sized dog with well balanced and well developed clean cut muscles. It has pricked ears and a curled or sickle tail. Conformation : strong, well-boned and compact.
